SUPPLEMENTARY INFORMATION:

Background

On April 9, 2015, the Department published the *Preliminary Results*. The POR is July 1, 2013 through June 30, 2014. We invited interested parties to comment on the *Preliminary Results*. We received no comments.

The Department conducted this administrative review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order

The merchandise subject to the order is solid urea, a high-nitrogen content fertilizer which is produced by reacting ammonia with carbon dioxide. The product is currently classified under the Harmonized Tariff Schedules of the United States (HTSUS) item number 3102.10.00.00. Previously, such merchandise was classified under item number 480.3000 of the Tariff Schedules of the United States. Although the HTSUS subheading is provided for convenience and customs purposes, the written description of the merchandise subject to the order is dispositive.

Changes Since the Preliminary Results

The Department made no changes to its calculations announced in the *Preliminary Results*.

Final Results of Review

For the final results of this review, we determine that a weighted-average dumping margin of 0.00 percent exists for MCC EuroChem for the POR.

Assessment Rates

In accordance with 19 CFR 351.212 and the *Final Modification*,² the Department will instruct U.S. Customs and Border Protection (CBP) to liquidate all appropriate entries for MCC EuroChem without regard to antidumping duties.

For entries of subject merchandise during the POR produced by MCC EuroChem for which it did not know its merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.³
